Deliver services to help clients identify weaknesses in the current cybersecurity framework and occurrence of a cybersecurity event. Enable clients to detect attacks effectively and efficiently.

- Cyber Security Incident & Response Drill Exercise
- Anti Phishing and Brand Protection Services
- Third Party Security Risk Management
- Security Operations Centre
- Vulnerability Management
- Cyber Threat Intelligence
- Remote Penetration Testing
- Compromise Assessment

4 Remediate & Correct

Assist clients in remediating the security weaknesses detected through the Root Cause Analysis of incidents or otherwise. Design and implement controls that help mitigate the risks adequately

- Enterprise Security Professional Certification & Training
- Cybersecurity Awareness Training
- Cybersecurity Skill Training
- Phishing Simulation

Our 24 x 7 SOC and TI

At a Glance

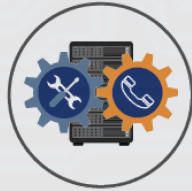

ISO 27001 Certified

For more than 10 years

More than 30 SOC SAs and Engineers

All our SOC team are certified with 2 to 15 years experience

With more than 10 years experience
in managed services

With more than 15 Financial Institutions
And Government agencies

Our Big Data Analytics

Spotlight

Spotlight comprises of the advanced innovations; tightly integrated into a single seamless platform which enables technical and business users to experience the full capabilities of Artificial Intelligence, Machine Learning, Business Intelligence, Private Messaging in an enterprise environment.

Spotlight is an 'Integrated Intelligence Suite' of products offering the ABC of Intelligence.

FORESIGHT - Data Science Studio

Foresight is the data science software platform for teams of data scientists, data analysts, and engineers to explore, prototype, build, and deliver their own data science solution more efficiently.

It supports the end-to-end data mining and machine learning process with a comprehensive visual and programming interface. In addition, it empowers analytics team members of all skill levels with a simple, powerful and automated way to handle all tasks in the analytics life cycle.

EAGLE EYE - Natural Language Processing

Eagle Eye is an 'Artificial Intelligence' system using NLP (Natural Language Processing) and Big Data technologies in processing vast volumes of structured and unstructured data. In addition, it provides 'Cognitive Search' capabilities for unstructured data stored in documents, log file, email etc.

As data flows into the platform, Eagle Eye's AI Engine enrich and map data into meaningfully defined objects and entities- people, organization, places, things, and events - and automatically form relationships that connects them.

Our Big Data Analytics

FALCON - Forces At Work

Falcon is an efficient and fully secure private messaging service that is wholly licensed and operated by the customer on premise, and with full autonomy for its policy and procedures.

It is ideal for 'Command Centers' with video streaming capabilities, location analytics, and integration to Eagle Eye for NLP.

MINI APPS - Data Collection and Work Flow

Mini Apps enables a broad range of app scenarios to be created that infuse digital transformation into manual and outdated processes.

With integration to Neura Chat for the mobile workforce; it may be used to solve business problems for task and role-specific scenarios like data collection for surveys, inspections, marketing campaigns, field sales enablement, prospect management.

INSTA BI

Insta BI comprises of a 'Full Stack Business Intelligence' solution with patented technologies in United States.

It is fully customizable for users to develop 'Business Intelligence Applications' or BI Apps for data analytics, data visualization, associative analysis, infographics and collaborations. The innovative Insta BI suite is enterprise level, and yet provides 'self-service' capabilities.

Our Big Data Analytics Services

1 Professional Consulting Services On:

a Advanced Analytics

- i. Data/Text Mining
- ii. Machine Learning
- iii. Pattern Matching
- iv. Forecasting
- v. Visualization
- vi. Semantic Analysis
- vii. Sentiment Analysis
- viii. Data Governance

b Business Analytics Consulting

- i. Analytics Discovery & Use case development
- ii. Analytics readiness & roadmap definition
- iii. Operational Technology roadmap

2 Implementation Services

a Business Intelligence & Data Warehouse Implementation

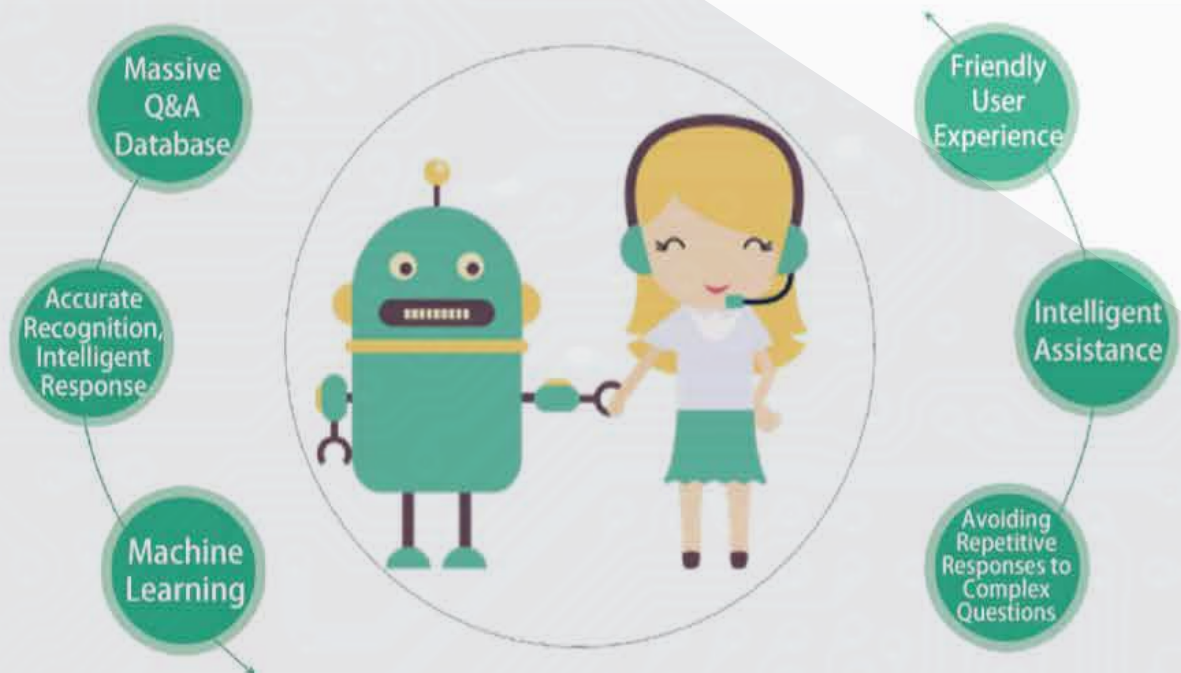

- i. Business/User Requirements
- ii. Data warehouse Design & ETL
- iii. Dashboard & Reports Development
- iv. Data Management

b Support Services

- i. Technical Support
- ii. Software Trainings
- iii. Analytics Training

Empowering Businesses with Intelligent AI Robots

- Providing 7x24 hours intelligent customer services
- Reduce workload by automating repetitive task, allowing employees to focus on more complex and high-priority task
- Reduce customer waiting time and provide quicker responses
- Assigning customer inquiries in a timely manner, to improve work efficiency and service quality.

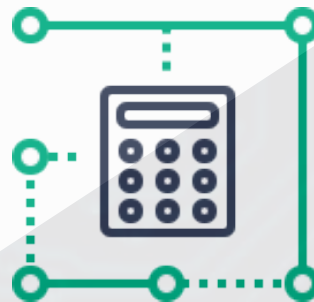

Empowering Businesses with Intelligent AI Robots

Resolving Customer Service Challenges for Businesses

Boosting Efficiency

Simplifying Customer Service Workload while Elevating Emotional Intelligence: AI-Driven Solutions for Customer Support

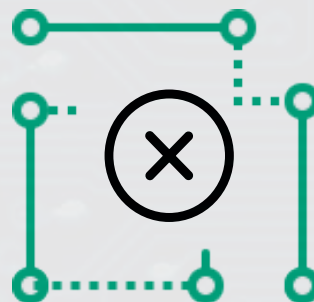

Optimizing Costs

Cutting Costs, Maximizing Efficiency; Tackling Training and Management Challenges

Enhancing User Experience

Elevating User Experience: AI-Powered Customer Service for Seamless Interactions

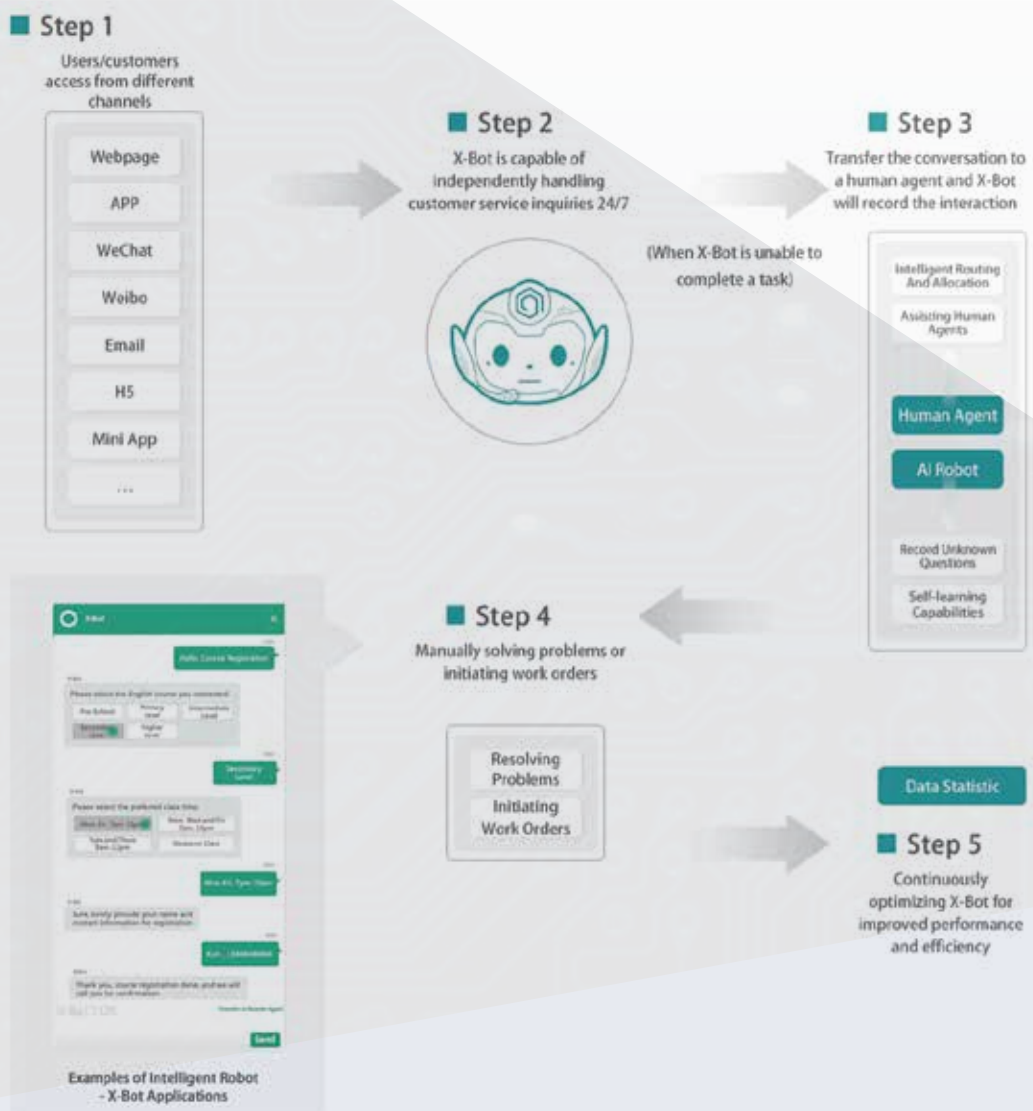

Organized Knowledge Management

Streamlined Knowledge Management: Empowering Accurate Responses with AI

X- Bot Business Process

Assists human customer service reception in all scenarios, empowering business to provide more accurate and effective services

- **X-Bot** is an AI text robot that utilizes top-level deep learning nlp algorithms to accurately identify and understand user’s real intentions through its capabilities in table graphing, semantic understanding and contextual logic memory.
- It combines dialogue scenarios, business characteristics and user attributes to provide accurate and effective services.
